

Neil Barton

Colour Zoom '12

Flying the flag for the UK, Neil Barton visited Miami as part of The International Colour Zoom '12 Creative Team as they presented the newly launched Fascia Nature collection at Colour Zoom. The three day spectacular of Goldwell's Colour Zoom Global Party held a series of presentations and seminars in the party city of Miami and Neil took centre stage to present his looks in the new collection.

At the biggest ever Colour Zoom Global event, which saw 2,600 hairdressers from over 40 countries, gather together for the launch of Fascia Nature. Neil and the Creative Team worked together in 2011 to create the stunning Fascia Nature; an exciting new colour concept with trend shades to create an unexpected twist for the colour palette.

Fascia Nature pays homage to the greatest and most impressive aspects of nature and the glorious colours and surreal diversity of shapes found there. The Colour Zoom '12 Creative Team, with Neil as a key player, developed the 'Butterfly Effect', a new colour technique based on simple, wing-shaped segments for beautiful eye-catching designs.

After a whirlwind visit to Miami, Neil is now back in the salon in Edinburgh speaking to clients about the opulent colours of fascia Nature and how they can be worked into an individual style. To add a bit of inspirational colour to your look, book a consultation at Neil Barton Hairdressing and see how Fascia Nature can be part of your look.
